

THE *FUTURE* SUCCESS PROGRAMME - BUILD YOUR GLOBAL SKILL SET

ONE WEEK
Full time (30hrs)
Stage 1

TWO WEEKS
Part time (30hrs)
Stage 1

TWO WEEKS
Full time (60hrs)
Stage 1 & 2

THREE WEEKS
Part time (55hrs)
Stage 1 & 2

Dedicated to building 21st century skills such as teamwork, collaboration, creativity and critical thinking alongside the more practical skills of project planning, time-management and giving presentations. Skills are developed through stand alone workshops and a short project, specifically designed to incorporate elements of all of these skills.

STAGE 1
THE FOUNDATION

Builds on the foundation and sees the students being introduced to the world of work by connecting with a local company. The company sets a real world brief, provides support, expertise and finally feedback as the students put the skills they have learned into practice and work in teams to plan, produce and present their projects.

STAGE 2
THE PRACTICE

THE WORKING ENVIRONMENT

The Hub

Designated solely for *FUTURE SUCCESS*, adaptable for workshops and designed for flexibility and collaboration, with the latest touch screen technology for presenting, students are encouraged to own the space while they are on the course, to establish meeting, study, research and relaxation spaces as required.

The online platform

Introducing students to current collaborative-working technology *FUTURE SUCCESS* is backed up by the use of G Suite for business. Linked into the platform and given access to powerful collaborative and creative online tools to promote teamwork, interaction and project development, students have interconnectivity 24 hours a day.

The *FUTURE SUCCESS* programme is designed for students aged 16-24 with a B1+ level of English.

Preparing students for

FUTURE SUCCESS

Build your own *FUTURE SUCCESS* experience.

THE *FUTURE* SUCCESS EXPERIENCE

FUTURE SUCCESS is a course designed to get students working together. A course about collaboration and sharing that enables and develops employability and global talent.

During the course students work collaboratively on a series of projects that focus on the mindset and attitude needed for the future job market, while developing the key communicating tool of that market, the English language. The projects grow in length and complexity and in line with STEAM's principles of integrating science, technology, engineering, the arts and maths, they give students the opportunity to contribute their existing knowledge while learning from others.

In learning spaces, physical and virtual, designed to make it easier to work together and alongside multi-disciplinary tutors, students work without barriers to create, innovate and collaborate inside and outside the school.

WHAT OUR STUDENTS SAY

"This course allowed me to improve my team working abilities, my English of course and those points I learned here will be really good for me in the future to find a job, to improve my CV and my career."

Luigi (age 19) - Brazil

"I would recommend the course to others because it was really useful and interesting. It helped me to improve my confidence, and the highlights were being able to work creatively within a team."

Linda (age 17), Italy

I was able to use my existing interpersonal skills during the two weeks and learned many new ones... I worked as part of a team and experienced a real working environment...It was a really interesting experience.

Cherry (age 18), China
